National University of Computer and Emerging Sciences

Laboratory Tasks Week 03

for

Web Programming

Spring 2024

FAST School of Computer Science

BOOTSTRAP & JAVA SCRIPT

Lab Task 1:

Demonstrate the following output using Bootstrap on your webpage. Add link to these boxes of bootstrap's main page (https://www.w3schools.com/bootstrap/bootstrap_ver.asp).In addition, these boxes should be closing boxes.

Lab Task 2: Display these buttons on your webpage using bootstrap and display any message on click of each button using JavaScript.

Lab Task 3:

Write a program in Java Script that take two number in input fields of the form and add, subtract, multiply and divide them both and display the result.

Lab Task 4:

Write a program in Java Script that ask user about the name of the month and display the total numbers of days in that month.

(Use shorthand like Jan, Feb)

Note: Days of month should be in Red Color.

Lab Task 5:

Write a program in Java Script that ask user about any number and print the table of that number.

Note: Not allowed to use form for this task.

You are done with your exercise(s), make your submission on Classroom.
